| AI Tools     | Permitted (with disclosure)                            |
| Website      | <a href="https://devclash.in">devclash.in</a>          |

## 1. Event Overview

---

DevClash is a 24-hour in-person hackathon organized by DevKraft, bringing together builders, designers, and problem-solvers to create impactful solutions under time pressure. Participants will work in teams across two official tracks, guided by problem statements exclusively issued by the organizers.

Visit our official website: [devclash.in](https://devclash.in)

## 2. Eligibility

---

DevClash is open to everyone. There are no restrictions based on age, educational background, profession, or prior experience.

- Participants must register as part of a team of 1 to 5 members.
- Each participant may be a member of only one team.
- Team members are not required to be from the same institution or organization.
- DevKraft organizers and judges are not eligible to participate.

## 3. Tracks & Problem Statements

---

DevClash features two official tracks. Problem statements for both tracks are exclusively provided by the DevKraft organizers. Participants may not define their own problem statement.

### 3.1 Track A — Web3

Build decentralized applications, blockchain-based solutions, smart contracts, DeFi tools, NFT platforms, or any project grounded in Web3 technology. Submissions must meaningfully leverage decentralized infrastructure.

**All Web3 projects must be deployed on the HeLa Blockchain.**

### 3.2 Track B — Others

Solve real-world problems using any technology stack. Projects must address the specific problem statement issued by the organizers. Domains include but are not limited to: Dev Tools, Fintech, EdTech, Career Development, Productivity Tools, and similar areas.

#### Hirex Sub-Track

Within the Others track, there is a dedicated sub-section of problem statements provided by Hirex. Teams competing in this sub-track will be evaluated separately, with their own winners crowned for this category.

**All intellectual property rights of winning projects in this sub-track are owned by Hirex.**

Problem statements for both tracks will be revealed at the start of the hackathon on April 18, 2026 at 10:00 AM. Teams must select their track at the time of registration and may not switch tracks after the hackathon begins.

## 4. Participation Rules

### 4.1 Team Rules

- Teams must consist of 1 to 5 registered participants.
- All team members must be present at the venue for the duration of the hackathon.
- Teams must work within their registered track only.
- Changing or swapping teammates is not permitted at any point — neither before the event nor after it has begun. Team composition is fixed from the time of registration.

### 4.2 Project Rules

- All code and design work must be created during the hackathon window (10:00 AM April 18 to 10:00 AM April 19).
- Teams may use pre-existing open-source libraries, frameworks, APIs, and public datasets, provided they are properly attributed.
- Reusing or submitting a project built before the hackathon — in whole or in part — is strictly prohibited.
- Teams must build a solution for the problem statement of their declared track.
- Projects may be developed using any programming language, framework, or platform.

### 4.3 AI Tools Policy

The use of AI tools is permitted and encouraged at DevClash, subject to the following conditions:

- Teams must disclose all AI tools used in their project (e.g., GitHub Copilot, ChatGPT, Claude, Midjourney, etc.) in the submission form.
- AI-generated code, content, or designs must be reviewed, understood, and adapted by the team — wholesale copy-paste without modification is discouraged.
- The core idea, problem-solving approach, and architecture must originate from the team.
- Judges may ask any team member to explain AI-generated portions of the project. Inability to explain the code may affect the evaluation score.

### 4.4 Equipment Advisory

Participants are encouraged to bring the following equipment to ensure smooth setup at the venue:

- Extension boards / power strips — to accommodate your team's devices.
- LAN-to-USB adapter (if your laptop does not have a built-in LAN port) — in case a wired internet connection is required.

Note: The above items are not mandatory, but bringing them if available is strongly recommended.

## 5. Hackathon Workflow

All teams must follow this structured workflow throughout the hackathon:

|               |                                                                                                                                                                                                                                                                                                                                                                   |
|---------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Step 1</b> | <b>Build the Project</b><br>Upon receiving the problem statement at 10:00 AM, teams begin implementation immediately. Build your solution within the hackathon window using any stack of your choice.                                                                                                                                                             |
| <b>Step 2</b> | <b>Judging Rounds</b><br>There will be 3 judging rounds during the hackathon (see Schedule). Judges will assess progress and provide feedback at each checkpoint. In the 1st judging round, judges will also review and evaluate your System Design Diagram outlining your proposed architecture and solution approach. Exact timings are listed in Section 8.    |
| <b>Step 3</b> | <b>Submit Your Project</b><br>Submit your project through the official portal before 10:00 AM on April 19. See Section 6 for full submission requirements.                                                                                                                                                                                                        |
| <b>Step 4</b> | <b>Post-Hackathon Deliverables</b><br>After the hackathon ends, teams must prepare and submit: (a) a presentation deck (PPT/PDF) explaining the solution and its implementation, and (b) a detailed Markdown file listing all technologies and AI tools used, along with a step-by-step guide to run the project on the judges' machines for evaluation purposes. |

## 6. Submission Guidelines

All submissions must be made before 10:00 AM on April 19, 2026. Late submissions will not be evaluated under any circumstances.

### 6.1 Required Submission Materials

- Project title and one-line description.
- Track selection (Web3 or Others).
- GitHub / GitLab repository link — must be public and contain all source code. If the repository is kept private, access must be granted to the assigned judge for evaluation purposes.
- Markdown file covering: all technologies and AI tools used, and a detailed step-by-step guide to get the project running on the judges' machines.
- Working demo — a deployed link, video walkthrough (3–5 minutes), or APK/build file.
- Presentation deck (PPT or PDF, 5–10 slides) covering problem, solution, demo, and future scope — to be submitted after the hackathon ends.

## 6.2 Submission Rules

- Each team may submit only one project.
- All code commits must be timestamped within the hackathon window. Commits made before the start time or after the deadline will disqualify the team.
- Teams must submit through the official submission portal provided by DevKraft.
- Submissions that do not include a working demo (link or video) will be considered incomplete and will not be evaluated.

## 7. Judging Criteria

Projects will be evaluated by a panel of judges appointed by DevKraft. Judging will be conducted across three rounds during the hackathon, with final evaluations and presentations after submissions close.

| Criteria               | Weight | Description                                                                                                                                                                                                                                                                            |
|------------------------|--------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Functional Correctness | 80%    | Solves the problem exactly as specified; all required features work correctly with stable, deterministic execution; end-to-end flow works without manual intervention; handles edge cases and invalid/empty/large inputs; maintains correct state handling, especially for Web3 logic. |
| Completeness           | 20%    | Entire required scope is implemented with no major missing features; all core flows are covered, not just the happy path.                                                                                                                                                              |

Judges' decisions are final and binding. No appeals will be entertained after results are announced.

## 8. Schedule at a Glance

| Time                          | Milestone                                      |
|-------------------------------|------------------------------------------------|
| April 18 — 8:30 AM            | Reporting                                      |
| April 18 — 10:00 AM           | Hackathon Begins & Problem Statement Reveal    |
| April 18 — 2:00 PM            | Lunch Break                                    |
| April 18 — 5:00 PM – 6:00 PM  | 1st Judging Round (incl. System Design Review) |
| April 18 — 6:00 PM            | Evening Tea Break                              |
| April 18 — 9:00 PM            | Dinner                                         |
| April 19 — 12:00 AM – 1:00 AM | 2nd Judging Round                              |
| April 19 — 8:00 AM            | Submissions Open                               |
| April 19 — 9:00 AM            | 3rd (Final) Judging Round                      |
| April 19 — 10:00 AM           | Hacking Ends — All Submissions Due             |
| April 19 — 10:00 AM onwards   | Final Evaluations & Presentations              |
| April 19 — TBD                | Results & Closing Ceremony                     |

**Results will be disclosed within 2–3 hours from the conclusion of the hackathon.**

| Round                     | Date     | Window             |
|---------------------------|----------|--------------------|
| 1st Judging Round         | April 18 | 5:00 PM – 6:00 PM  |
| 2nd Judging Round         | April 19 | 12:00 AM – 1:00 AM |
| 3rd (Final) Judging Round | April 19 | 9:00 AM            |

The schedule is subject to minor adjustments at the discretion of the organizers. Announcements will be made on-site.

## 9. Code of Conduct

---

DevClash is committed to providing a safe, inclusive, and respectful environment for all participants. By registering for this event, you agree to abide by the following:

### 9.1 Expected Behaviour

- Treat all participants, organizers, mentors, and judges with respect and professionalism.
- Collaborate in good faith and compete fairly.
- Respect the physical venue and its facilities.
- Report any concerns or incidents to a DevKraft organizer immediately.

### 9.2 Prohibited Behaviour

- Harassment, discrimination, or offensive conduct of any kind, including based on gender, race, religion, nationality, disability, or sexual orientation.
- Plagiarism, copying other teams' work, or submitting pre-built projects.
- Sabotaging or tampering with another team's project or equipment.
- Sharing access credentials or submission materials with non-registered individuals.
- Any form of cheating, deception, or misrepresentation during submissions or presentations.

### 9.3 Consequences

Violations of the Code of Conduct may result in immediate disqualification of the team, removal from the venue, and/or a ban from future DevKraft events. Organizers reserve the right to make final decisions on all conduct matters.

## 10. General Rules & Disclaimers

---

- DevKraft reserves the right to modify rules, schedule, or judging criteria with prior notice to participants.
- Participants are responsible for their own hardware, software, and personal belongings. DevKraft is not liable for any loss or damage.
- By participating, teams grant DevKraft the right to photograph, record, and publicly share their project for promotional purposes.
- All intellectual property created during DevClash remains the property of the respective team, except for Hirex sub-track winners whose IP is owned by Hirex.
- Organizers may disqualify any team found violating these rules at any point, including after the event.
- Participation in DevClash constitutes full acceptance of all rules stated in this document.

## 11. Contact & Support

---

For queries, clarifications, or support before or during the event, reach out to the DevKraft team:

- On-site: Approach any DevKraft volunteer or organizer wearing the official team badge.
- Email: [devkraftclub@gmail.com](mailto:devkraftclub@gmail.com)
- Website: [devclash.in](https://devclash.in)
- WhatsApp Group: Join the participants WhatsApp group here

Official Discord / WhatsApp group link will also be shared upon registration confirmation.

**Best of luck to all participants!**
